

Automatic Digital Rice Cooker

This automatic rice cooker is designed for efficient and precise cooking. It features a digital display, multiple cooking modes, and a non-stick inner pot and utilizes induction heating technology for even heat distribution.

Overview

Advanced Induction Heating Technology

This automatic digital rice cooker utilizes advanced electromagnetic surround heating to ensure uniform and rapid heat distribution. The 3.0mm steel composite inner pot promotes even cooking, resulting in consistently soft and fragrant rice. Designed for modern kitchens, it features an intuitive touch interface and intelligent cooking programs for enhanced convenience.

Technical Specifications

Inner Pot Thickness	3 mm
Heating Method	Electromagnetic induction (IH)

Features

Cooking Modes

- Intelligent rice cooking program
- Ultrafast cooking mode
- Reserved timing/Delay start

Interface	Touch keys, Large LCD, Clock display
