Product Overview

Professional Dough Processing Solution

This automatic dough folding and sheeting machine is engineered for high-efficiency performance in commercial kitchens. Built with a durable stainless steel body, it ensures hygiene and longevity while handling various dough types, including bread, pizza, and pastry. The integrated automatic folding mechanism streamlines production, while the high-load motor provides the power necessary for consistent, professional results.

Technical Specifications

Roller Thickness Range	25 mm
Adjustment Type	Stepless
Motor Capability	High load motor

Construction & Design

Body Material

Stainless Steel

Key Features

Automatic Folding, Emergency Stop, Mobile Wheels, Variable Speed

Applications

Compatible Dough Types

- Bread Dough
- Pizza Dough
- Pastry Dough
