

Automatic Earloop Welding Machine for Face Mask Production

This machine automatically welds earloops onto face masks. It operates at a processing speed of 20 earloops per minute.

Product Overview

High-Efficiency Earloop Welding

This automatic earloop spot welding machine is engineered for the high-speed production of disposable face masks. Designed for reliability in high-volume manufacturing, it ensures precise and consistent attachment of earloops to 3-ply mask bodies. The system is optimized to work efficiently alongside mask body production lines to streamline your manufacturing process.

Performance Metrics

Welding Speed

20 pcs/min

Welding Speed

Recommended Line Setup

One face mask body machine is best matched with two or three ear band welding machines for optimal output balance.

Technical Details

Compatible Masks

3-ply disposable face masks

Welding Capacity

Welds two earloops at a time
