

Automatic Edge Banding Machine for Woodworking

This automatic edge banding machine is designed for woodworking. It features a robust construction with a transparent protective enclosure, a control panel, and gauges for precise adjustments.

Product Overview

Industrial Edge Banding Excellence

The KL-560 automatic edge banding machine is engineered for high-precision woodworking applications in industrial settings. It features a robust structural design ensuring durability and stability during heavy-duty operations. Equipped with an intuitive control panel and protective enclosure, this system provides operators with the necessary precision and safety for professional edge banding tasks.

Technical Specifications

Model Designation	KL-560
Category	Automatic, Edge Bander, Woodworking Machinery

Key Features

Safety Equipment

- Transparent protective enclosure
- Integrated control panel
- Precise adjustment gauges
