## ADDITIONAL IMAGES

## Overview

### Automatic Electric Caravan Step

This automatic electric caravan step is designed to provide seamless and safe access to caravans and RVs. Engineered for maximum convenience, the step automatically extends and retracts in synchronization with the caravan door operation. Built with a durable aluminum construction and a black powder-coated steel frame, it offers excellent corrosion resistance and long-lasting stability for various vehicle models.

## Construction & Design

### Surface Features

Anti-slip surface • Corrosion resistant

### Materials

Aluminum, Powder-Coated Steel

## Features & Performance

### Key Benefits

- Enhanced entry safety
- Convenient hands-free operation
- Stable footing

### Operation

Automatic extension and retraction linked to door operation
