

Automatic Electric Shoe Polisher with Brush System

This automatic shoe polisher uses rotating brushes to efficiently clean and polish shoes. It features a compact design, durable construction, and a built-in mat for collecting debris.

Product Overview

Professional Automatic Shoe Polisher

This automatic shoe polisher offers an efficient and contactless solution for maintaining footwear hygiene in professional environments. Featuring an infrared induction system, it ensures a touch-free operation for user convenience. Designed with a durable housing and a multi-brush system, this unit provides thorough cleaning and polishing for various shoe types while maintaining a low-noise operational profile.

Technical Specifications

Voltage

230 V

Input Voltage

Power Rating

120 W

Features

Brush Configuration

- 2x Detachable soft brushes
- 1x Hard brush

Activation Method

Infrared Induction
