

Automatic Filling and Packaging Line

This automatic production line is designed for filling and packaging edible seasonings, oils, and machine oils. It features a conveyor system and a multi-head filling station for efficient, high-volume packaging.

Product Overview

High-Efficiency Packaging Solution

This automatic bulking production line is engineered for high-volume filling and packaging of diverse liquids, including edible seasonings, cooking oils, and industrial machine oils. Featuring a robust conveyor system and a multi-head filling station, the machinery ensures consistent throughput and precision for both food-grade and industrial applications. Designed for seamless integration into modern production environments, it offers a scalable solution for businesses seeking to optimize their packaging workflows.

Technical Specifications

Industry Sector

Food Processing • Industrial Manufacturing

Key Features

- Automatic conveyor system
- Multi-head filling station
- High-volume throughput capacity

Suitable Applications

Edible Seasonings, Cooking Oils, Machine Oils
