

Automatic Filling and Sealing Machine

This automatic packaging machine is designed for high-speed filling and sealing of containers. It features stainless steel construction, a programmable logic controller (PLC), and adjustable settings.

Overview

High-Efficiency Filling and Sealing Solution

This automatic packaging machine is engineered for high-speed filling and sealing of containers, making it an ideal choice for streamlining production lines. Built with durable stainless steel, it features a programmable logic controller (PLC) for precise operational control and adjustable settings to accommodate various container sizes. Designed for versatility, it supports multiple filling heads and sealing stations to maximize throughput, while ensuring operator safety through enclosed guarding and emergency stop mechanisms.

Technical Specifications

Construction Material	Stainless Steel
Control System	Programmable Logic Controller (PLC)
Safety Features	Enclosed Guarding, Emergency Stop Mechanisms

Applications

Suitable Industries

Food Processing • Pharmaceutical • Chemical

Performance

Operational Capabilities

1 Qty

Multiple Filling Heads

1 Qty

Multiple Sealing Stations
