

Automatic Flat Sewing Machine

This industrial-grade automatic flat sewing machine is designed for professional use. It features adjustable stitch length, precise tension control, and a high-efficiency motor for increased productivity.

Product Overview

Industrial-Grade Performance

This industrial-grade automatic flat sewing machine is engineered for professional environments requiring durability and high-speed operation. It features a robust construction to ensure stability during intensive use and includes an automatic lubrication system for consistent, smooth performance. Designed for versatility, it is an ideal solution for garment manufacturing, upholstery, and various sewing applications involving fabrics, leather, and synthetics.

Key Features

Core Functionalities

- Automatic lubrication system
- Adjustable stitch length
- Precise tension control
- High-efficiency motor

Material Compatibility

Fabrics, Leather, Synthetics
