

# Automatic Fried Dumpling Machine

This machine automates the production of fried and steamed dumplings with consistent results. It is compatible with various doughs, including wheat flour, rice powder, and sweet potato powder.

## Product Overview

### Professional Dumpling Production

This automatic fried dumpling machine is designed to deliver consistent, handmade-quality results for food processing facilities and restaurants. It features a scientific feeding system that handles both meat and vegetable fillings while maintaining optimal texture. With its compact footprint and low-noise operation, it is an efficient solution for small-to-medium scale production environments.

## Technical Specifications

### Working Speed

**1500 pcs/h**  
Output

Model	FDHT-28
Power Consumption	90 W
Voltage	220V, 50Hz

## Dimensions and Weight

Dimensions (L x W x H)	350 x 370 x 480mm (701mm with hopper)
Weight	45 kg

## Performance Features

### Dumpling Specifications

Feature	Details
Standard Weight	21-24g
Adjustable Range	15-30g
Compatible Doughs	Wheat flour, rice powder, sweet potato powder

### Operational Benefits

- Low noise operation
- Low power consumption
- Compact design
- Handmade-style forming

Compatible Fillings	Meat, Vegetable
