Product Overview

Efficient Garden Irrigation Solution

The Automatic Garden Jet Water Pump is a high-performance, self-priming pump engineered for residential water supply, irrigation, and pressure boosting applications. It features an integrated automatic control system that intelligently regulates operation based on real-time water demand, ensuring consistent pressure and reliable performance. Built for durability and ease of use, this unit includes clear status indicators for power, pump activity, and system diagnostics.

Technical Specifications

Performance Metrics

1.1 kW

Max Power

10 A

Max Current

1 MPa

Max Pressure

Electrical Requirements

- Voltage: 220V-240V
- Frequency: 50Hz / 60Hz
- Max Current: 10A

Features & Controls

Certifications

CE

Control System Features

Automatic Pump Control, Power Indicator, Pump Operation Indicator, Failure Status Indicator, Manual Restart Button
