

# Automatic Glass Bottle Liquid Filling Machine

This automatic machine is designed for filling glass bottles with beverages and liquid food products. It features a stainless steel construction, multiple filling stations, and a conveyor system for efficient bottle handling.

## ADDITIONAL IMAGES

## Overview

### Advanced 3-in-1 Filling Technology

The XGF16126 is a specialized 3-in-1 automatic production line designed for the efficient washing, filling, and sealing of glass bottles. Engineered for high-performance beverage processing, it integrates advanced filling technology to ensure consistency and precision. This system is ideally suited for bottling wine, pure water, mineral water, and various other liquid food products.

## Technical Specifications

Filling Stations	16 heads
Machine Configuration	3-in-1 (Washing, Filling, Sealing)
Construction Material	Stainless Steel, Food Grade

## Control & Operation

### Automation Features

- Automated filling process
- Conveyor system with auger screw spacing
- Digital control panel interface
- Emergency stop safety mechanism

### Core Components

Mitsubishi PLC • Rotary Platform • Precision Filling Heads

## Performance Metrics

### Performance Highlights

**16 units**
