Product Overview

Automatic Gravity Air Vent Car Phone Holder

This modern alloy car phone holder features a gravity-activated clamping mechanism that allows for effortless one-handed operation. Designed for air vent mounting, it ensures a clear field of vision and safe driving by keeping your dashboard unobstructed. The secure linkage system automatically locks your device in place using its own weight, providing a stable grip for navigation and hands-free calls.

Key Features

Easy put in & take out by one hand

Broad vision & safe driving

One-hand operation allows for easy placement and removal while maintaining a broad field of vision for safe driving.

Adapt to multi-angle viewing

Rotary Ball Joint Design Allow Multi-angle viewing as required

Non-slip Clip

Support strong pressure angles with 360 rotation

The rotary ball joint design supports 360-degree rotation, allowing for multi-angle viewing as required.

Receive charge port

Unique cutout allows you to insert charger cable phone without blocking your phone charging port!

A unique cutout allows for easy insertion of a charging cable without blocking the phone's port.

Soft Rubber Pad

Protects your devices from scratches

Integrated soft rubber pads protect your mobile device from scratches and increase grip stability.

Core Functionality

- Gravity clamping for easy one-hand placement and removal
- Air vent mounting to prevent blocking driver eyesight
- 360-degree rotary ball joint for multi-angle viewing
- Soft rubber padding to protect devices from scratches
- Unique cutout design for unhindered charging port access
