

Automatic Grind and Brew Coffee Maker

This coffeemaker freshly grinds coffee beans for optimal flavor in every drip-style brew. Adjustable grind and cup settings allow users to easily customize the brew strength to their preference.

Overview

Freshly Ground Coffee Experience

This automatic grind and brew coffee maker simplifies the morning routine by combining a high-performance conical burr grinder with a precision brewing system. Designed for convenience, it features a fully programmable 24-hour timer and an intuitive digital LCD display. With customizable strength and cup settings, users can enjoy café-quality coffee brewed from fresh beans in the comfort of their own kitchen.
