

Automatic Handpiece Cleaning and Lubrication System

This system automatically cleans and lubricates handpieces using ultrasonic technology. It features a digital display for setting time and temperature, a stainless steel construction, and a basket for holding items.

Product Overview

Professional Cleaning & Lubrication System

This advanced ultrasonic cleaning system is engineered for the precise maintenance of dental handpieces and small precision instruments. Constructed from durable stainless steel, it features an intuitive digital interface for accurate control over cleaning cycles and temperature settings. Designed for efficiency and reliability, this unit ensures optimal hygiene and equipment longevity in medical, dental, and industrial environments.

Technical Specifications

Model	RTX 6000D
Material	Stainless Steel
Features	Ultrasonic Cleaning, Digital Display, Temperature Control, Time Settings

Application Areas

Suitable Environments

- Dental Clinics
- Medical Facilities
- Industrial Settings
