Overview

Advanced Hot Melt Labeling Solution

This automatic hot melt glue labeling machine represents a highly efficient solution for diverse packaging requirements. Engineered for reliability and low operational costs, it supports various container shapes including round, square, and eclipse bottles. The system offers flexible integration, allowing for labeling either before or after the filling process to suit specific production line needs.

Technical Capabilities

Labeling Timing

- Before filling
- After filling

Supported Bottle Shapes

Round, Square, Eclipse

Industry Applications

Target Industries

Cosmetics • Chemical • Food & Beverage • Condiments • Pharmaceutical

Design & Safety

Safety Features

- Emergency stop buttons
- Interlocked safety guards

Construction

Stainless steel for durability and hygiene

Control Interface

Touchscreen panel for parameter adjustment and monitoring
