

# Automatic Hygiene Hand Dryer

This automatic hand dryer utilizes SCM technology to prevent unnecessary activation with a 0.5s delay. It also automatically stops after one minute of continuous operation.

## Product Overview

### Efficient Hygiene Solution

This automatic hand dryer provides a touch-free, hygienic solution for commercial and public restrooms. Engineered with advanced SCM technology, it ensures reliable operation with a 0.5-second sensing delay to prevent accidental activation. Designed for safety and longevity, the unit includes automatic cut-off features to protect against overheating and overcurrent, making it a dependable choice for high-traffic environments.

## Technical Specifications

Sensing Delay Time	0.5 s
Auto-Stop Limit	1 min

## Safety Features

Protection Mechanisms	Overheat Protection, Overcurrent Protection, Automatic Shut-off
-----------------------	---

## Applications

### Recommended Locations

- Hotels
- Restaurants
- Airports
- Office Buildings
- Hospitals
