

# Automatic Jar Filling Machine

This automatic jar filling machine is designed for filling viscous substances like jams and sauces into jars. It can be equipped with heating and stirring functions.

## ADDITIONAL IMAGES

## Product Overview

Designed for integration into complete filling lines to maximize throughput.

### Professional Automatic Jar Filling Solution

This automatic jar filling machine provides a reliable and consistent solution for filling diverse viscous liquids, including various fruit jams and salad dressings. Designed for high efficiency, the system eliminates filling uncertainty, ensuring a smooth and precise operation for every cycle. Optional heating and stirring functions can be integrated to handle specialized product requirements.

## Technical Specifications

High-speed filling unit featuring adjustable nozzles and stainless steel construction.

|              |              |
|--------------|--------------|
| Model        | CK-GT4T-4G   |
| Voltage      | 220V 50/60Hz |
| Air Pressure | 0.5-0.7Mpa   |

## Components & Construction

|                 |                        |
|-----------------|------------------------|
| Body Material   | SUS304 Stainless Steel |
| Piston Material | PTFE                   |
| Main Cylinder   | SMC                    |
| PLC & Screen    | Delta                  |

## Performance

Equipped with multiple filling heads for consistent, high-volume production.

Integrated conveyor system ensures seamless jar transport and positioning.

### Filling Volume Range

**100 ml**

Min Volume

**1000 ml**

Max Volume

|               |                   |
|---------------|-------------------|
| Filling Heads | 4                 |
| Filling Speed | 16-20 Bottles/Min |

## Applications

|                     |   |
|---------------------|---|
| Compatible Products | Mango Jam, Sydney Jam, Cherry Jam, Lemon Jam, Strawberry Jam, Apple Jam, Salad Dressing |
|---------------------|---|
