

# Automatic Juice Filling Machine

This automatic juice filling machine is designed for efficient and hygienic beverage production. It is capable of handling various juice types and carton sizes.

## Product Overview

### Professional Juice Extraction System

This high-performance automatic juicing equipment is engineered for the efficient processing of fruits and vegetables, including pineapple, carrot, and aloe. It features an integrated system for crushing, juice extraction, and automated dreg discharge to maximize production throughput. Built with food-grade stainless steel components, it ensures compliance with strict hygiene standards for the beverage industry.

## Technical Specifications

### Compatible Materials

- Pineapple
- Carrot
- Apple
- Aloe
- Cactus

Material Contact Surface	Stainless steel
Extraction Method	Screw shaft push extrusion
Process Functions	Crushing, Juice extraction, Automatic dreg discharge

## Operational Features

### Ease of Use

Easy operation • Easy maintenance

Screen Options	Customizable aperture sizes based on material characteristics
----------------	---

## Safety & Control

Control System	Programmable Logic Controller (PLC)
Safety Mechanisms	Emergency stop, Enclosed operation area
