

Automatic Laundry Folding Machine

The automatic laundry folding machine is designed for high-volume laundry operations. It efficiently folds various types of linens and garments, reducing labor costs and improving productivity.

Product Overview

High-Efficiency Laundry Folding

The ZD-V series automatic folding machine is engineered to optimize high-volume laundry processing. By automating the folding of linens and garments, this equipment significantly lowers labor costs while increasing throughput. Its durable construction ensures reliability for demanding commercial environments such as hotels and hospitals.

Technical Specifications

Model Number	ZD2500-6
