

Automatic Light Control Switch

This automatic light control switch is designed for energy saving and convenience. The device features a compact design suitable for DIN rail mounting, allowing for easy installation in electrical panels.

Product Overview

Smart Illumination Control

The TH-192 is an advanced automatic light control switch engineered for precision energy management in residential, commercial, and industrial environments. By utilizing an integrated photosensor, the device accurately detects ambient light levels to trigger connected circuits, ensuring lights operate only when required. Its compact design facilitates efficient DIN rail mounting, making it a seamless addition to professional electrical panel configurations.

Technical Specifications

Ideal Applications

- Residential
- Commercial
- Industrial

Model Number

TH-192

Mounting Style

DIN Rail

Features

Performance Benefits

Energy Saving • Automatic Operation • Compact Design
