

# Automatic Liquid and Sauce Packaging Machine

This automatic packaging machine dispenses and seals liquid and semi-liquid products. It is constructed with stainless steel for hygiene and durability, making it suitable for food and pharmaceutical applications.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Liquid Packaging Solution

This automatic packaging machine is engineered for precision dispensing and sealing of liquid and semi-liquid products, including sauces, creams, lotions, and oils. Constructed with durable stainless steel, it is optimized for food and pharmaceutical applications where hygiene is paramount. The system features an all-mechanical design built for long-term reliability and consistent production output.

## Performance Metrics

### Production Speed

**50 bags/min**  
Maximum Speed

**30 bags/min**  
Minimum Speed

### Expected Service Life

10 - 15 years

## Technical Specifications

### Suitable Applications

- Sauces
- Creams
- Lotions
- Oils
- Food Products
- Pharmaceuticals

### Key Components

- Film roll holder
- Forming tube
- Filling nozzle
- Product reservoir
- Sealing jaws
- Control panel
- Casters

### Sealing Technology

Rotary sealing

### Material

Stainless Steel
