

# Automatic Liquid Bagging Machine

This machine ensures consistent and reliable operation with easy operation and a low failure rate. It is designed for filling and sealing water and other low-viscosity liquids into plastic bags.

## ADDITIONAL IMAGES

## Product Overview

### Professional Automatic Liquid Bagging Solution

This high-performance automatic liquid bagging machine is engineered for the efficient filling and sealing of water and other low-viscosity liquids. Built with durable stainless steel, it ensures hygiene and longevity in food and beverage production environments. The system is proven reliable, serving over 8,000 users with a reputation for consistent operation, minimal downtime, and high-precision sealing.

## Performance & Quality

### Key Operational Metrics

**8000 Users**

Deployment Count

### Certifications & Standards

Provincial Appraisal Approved, Patent Invention Gold Medal, State Bureau of Technical Supervision Inspected

## Technical Specifications

### Design & Construction

- Stainless steel construction
- Adjustable filling volume
- Precision heat sealing mechanism
- Compact footprint
- User-friendly control interface

### Applications

Drinking Water • Fruit Juice • Beverages • Low-Viscosity Liquids
