

Automatic Liquid Filling and Sealing Machine

This automatic liquid filling and sealing machine efficiently packages various liquids. It automates filling and sealing, ensuring consistent, hygienic results with a durable stainless steel build and adjustable settings.

Overview

High-Efficiency Liquid Automation

The XY type full automatic liquid packing machine is an advanced solution designed for the precise filling and sealing of various liquids in industrial environments. Engineered for versatility, it streamlines the entire packaging workflow to provide consistent, hygienic results. With its robust stainless steel construction, it is perfectly suited for demanding applications in the food, beverage, pharmaceutical, and cosmetic industries.

Technical Features

Integrated Systems

- Liquid filling system
- Automated sealing mechanism
- Control panel for operation and monitoring

Machine Type	Full automatic liquid packing machine
Construction Material	Stainless Steel

Operational Capabilities

Adjustable Parameters

Adjustable Fill Volume • Adjustable Speed

Applications

Recommended Industries

- Food and Beverage
- Pharmaceuticals
- Cosmetics
