

Automatic Liquid Filling and Sealing Machine

This automatic machine is designed for high-speed filling and sealing of containers. It features stainless steel construction, an integrated control panel, and multiple filling heads for efficient operation with liquid and semi-liquid products.

Overview

High-Efficiency Liquid Packaging

This automatic liquid filling and sealing machine is engineered for high-speed, reliable production environments. Featuring a robust stainless steel construction, it ensures durability and hygiene for various liquid and semi-liquid product applications. The integrated control panel allows for precise operation, while the multi-head filling system maximizes throughput and efficiency.

Technical Specifications

Filling Heads	4 heads
Construction Material	Stainless Steel
Compatible Products	Liquid, Semi-liquid

Key Features

Automation Level	Fully Automatic • High-Speed
Control System	Integrated Control Panel
