

Automatic Liquid Filling and Sealing Machine

This automatic machine fills containers with precise amounts of liquid or semi-liquid products before sealing them. It features adjustable filling volumes, automatic film unwinding and cutting, and precise temperature control.

Overview

High-Efficiency Filling and Sealing

The BG32A is a fully automatic filling and sealing machine engineered for high-volume production environments. Constructed with durable stainless steel, it ensures optimal hygiene and longevity for demanding packaging lines. It delivers precise liquid or semi-liquid filling and reliable sealing, making it an ideal solution for food, beverage, pharmaceutical, and cosmetic industries.

Key Features

Automation Features

- Automatic filling process
- Automatic film unwinding and cutting
- Precise temperature control for sealing
- Adjustable filling volumes

Safety Features

Emergency Stop, Safety Guards

Technical Specifications

Suitable Applications

Food & Beverage • Pharmaceutical • Cosmetic

Material

Stainless Steel

Control System

User-friendly control panel with digital display
