

Automatic Liquid Filling, Capping, and Labeling Machine

This automatic machine integrates liquid filling, capping, and labeling. It features stainless steel construction, precise filling nozzles, adjustable capping heads, and an integrated labeling system.

Overview

High-Efficiency Liquid Packaging Solution

This automatic liquid filling, capping, and labeling machine is engineered for high-speed production environments, offering a seamless, all-in-one solution for bottling operations. Built with durable stainless steel, it ensures hygiene and longevity, making it ideal for water, juice, and various beverage industries. The system features advanced PLC control for precise automation, monitoring, and consistent output quality across the entire packaging line.

Technical Specifications

Construction Material

Stainless Steel

Model Number

RXGF40-40-10

Control System

Programmable Logic Controller (PLC)

Key Features

Core Functionalities

- Automatic Liquid Filling
- Automatic Capping
- Integrated Labeling

Suitable Applications

Water Bottling, Juice Production, Beverage Packaging

Performance Metrics

Performance Highlights

40 units

Filling Heads

40 units

Capping Heads
