Overview

High-Efficiency Liquid Packaging Solution

This automatic liquid pouch filling and sealing machine is engineered for high-volume production, offering an elegant and attractive finish through hydraulic pressure filling. Utilizing imported pneumatic drive elements, the system ensures precision, stability, and firm positioning during operation. Designed for versatility, it supports compound film packaging, effectively extending product shelf life up to three months post-sterilization.

Technical Specifications

Model	KF-8000
Power	3 kW
Voltage	380 V
Air Pressure	0.6 MPa

Performance Metrics

Production Capacity

2000 bags/hour
Output

Capabilities

Packaging Features

- Hydraulic pressure filling system
- Imported pneumatic control components
- Stainless steel construction
- Multi-head filling system
- Adjustable filling volume and sealing temperature
- Compound film compatibility

Suitable For

Japanese bean curd, Milk, Soya-bean milk, Peanut milk, Yogurt, Juice, Water, Sauces
