Overview

Automated Liquid Packaging Solution

This Automatic Liquid Pouch Filling Machine is a high-efficiency vertical form-fill-seal (VFFS) system designed for the precise packaging of various liquid products. Constructed from durable, hygienic stainless steel, it ensures reliability and compliance with food-grade standards. The machine features an intuitive control panel for easy parameter setting, making it an ideal solution for packaging water, juice, milk, sauces, oils, and chemical liquids into airtight, leak-proof pouches.

Technical Specifications

Machine Type	Vertical Form Fill Seal (VFFS)
Construction Material	Stainless Steel
Control System	Programmable Logic Controller (PLC) with digital display
Mobility Features	Yes

Capabilities

Advanced Features

- Date coding
- Gas flushing
- Easy-tear notches
- Adjustable filling volume
- Adjustable pouch size

Compatible Liquids	Water, Juice, Milk, Sauces, Oils, Chemicals
--------------------	---

Safety & Operation

Sealing Mechanism	Heat sealing
Safety Features	Yes
