Product Overview

High-Efficiency Liquid Packaging

This automatic liquid pouch filling machine is designed for efficient, high-speed packaging of various liquids. It integrates UV sterilization, bag forming, filling, and code printing into a single, reliable process. Built with durable stainless steel, it ensures hygiene and consistent performance, making it an ideal solution for the food, beverage, and chemical industries.

Technical Specifications

Safety Features

Emergency stop • Safety interlocks

Compatible Materials	Single-layer PE film
Construction Material	Stainless steel
Control System	PLC control system

Performance & Features

Supported Liquid Types

- Pure water
- Milk
- Soybean milk
- Fruit juice
- Beverage
- Soy sauce
- Vinegar
- Wine

Integrated Functions

- UV sterilizing
- Bag forming
- Filling
- Code printing
- Adjustable filling volume
- Sealing temperature control
