Product Overview

Professional Airport Luggage Security

This automatic luggage wrapping machine is specifically engineered for airport and transportation hub environments to enhance security and protect passenger belongings. By applying 3 to 5 layers of stretch film, the system prevents tampering, theft, and physical damage during transit. The movable, rotary turntable design allows for efficient, manual operation that is both flexible and durable.

Technical Specifications

Turntable Speed	20 RPM
Max Weight Capacity	100 kg
Packing Efficiency	20-40 loads/hour
Voltage	AC 220V

Performance Features
