Overview

Industrial Maize Milling Solution

This automatic maize flour mill is a complete processing line designed for efficient grain milling and flour production. The system incorporates advanced cleaning, grinding, and sifting stages to deliver consistent particle size and high-quality output. Engineered for reliability in industrial environments, it supports medium to large-scale operations with features like automated packing and integrated dust control.

Capabilities

Processing Stages

- Cleaning
- Grinding
- Sifting
- Pneumatic Conveying
- Automated Packaging

Production Outputs

Flour, Small Bran, Big Bran, Germ, Fodder Flour, 30# Grits, 24# Grits, 16# Grits, 8# Grits

Technical Specifications

Key Components

- Roller Mills
- Cyclone Separators
- Pneumatic Conveying System
- Electrical Control Panels
- Bagging System

Support & Service

Warranty & Support

1 Year Quality Guarantee • 1 Year Free Spare Parts • Lifelong Technical Service

Turnkey Project Services

- Special Design
- Installation
- Commissioning
- Worker Training
