Product Overview

Integrated Monoblock Solution

This fully automatic monoblock machine streamlines production by integrating bottle washing, filling, capping, and labeling into a single, high-efficiency unit. Designed for non-carbonated liquids such as water, wine, juice, and liquid seasonings, it offers a versatile solution for modern bottling lines. Its stainless steel construction ensures durability and compliance with strict hygiene standards, while the advanced control system allows for precise operation and easy monitoring.

Technical Specifications

Compatible Products

- Water
- Wine
- Juice
- Vinegar
- Soybean sauce
- Non-carbonated drinks

Integrated Processes

Washing, Filling, Capping, Labeling

Material

Stainless Steel

Performance

Automation Level

Full Automatic

Key Features

- High-precision filling system
- Adjustable settings for various bottle sizes
- Integrated control panel
- High-speed production capability

Configuration

3-in-1 Monoblock (Washing, Filling, Capping)
