

Automatic Noodle and Sausage Maker

This automatic machine is designed for creating various types of noodles and sausages. It features interchangeable molds for producing thin noodles, wide noodles, and sausages.

Product Overview

Automatic Noodle and Sausage Maker

This versatile automatic kitchen appliance is designed for efficient home use, capable of producing a variety of noodles including lasagna and narrow noodles, as well as homemade sausages. It features a user-friendly design with detachable parts for easy cleaning and assembly, ensuring a sanitary food preparation process. Safety is prioritized with a dual-switch system to prevent misuse, while the non-slip rubber feet ensure stability during operation.

Technical Specifications

Rated Voltage	220 V
Rated Frequency	50 Hz
