Product Overview

Automatic Nut Chopping Solution

This automatic chopping machine is engineered for the food processing industry, providing a reliable solution for sizing various nuts and beans. It utilizes a three-stage process—feeding, chopping, and classification—to ensure consistent particle sizes for peanuts, almonds, walnuts, hazelnuts, and chestnuts. The system features adjustable settings, allowing operators to modify the feeding conveyor speed to achieve specific cut sizes.

Technical Features

Operational Stages

- Vibration Feeding
- Rolling Knife Chopping
- Particle Classification

Compatible Materials

Peanuts, Almonds, Walnuts, Hazelnuts, Chestnuts, Beans

Support & Service

Maintenance and Support

The machine includes a one-year warranty with lifelong maintenance support. Technical support is provided for all users. Free replacement parts are available within the warranty period for defects related to design; however, damages caused by human factors remain the responsibility of the user.

Warranty Period

1 Year
