Product Overview

Professional Nut Milling Solution

This automatic milling machine is engineered specifically for processing various nuts into fine powders, including peanuts, almonds, and walnuts. It utilizes a vibration feeding system to ensure consistent material distribution, resulting in uniform particle size and high-yield output. Designed for efficiency and reliability, the unit operates with low noise levels and low consumption, making it an ideal choice for food processing applications.

Key Features

Operational Highlights

High Yield • Uniform Particle Size • Low Noise • Low Energy Consumption • No Oil Return

Processable Materials

Peanuts, Almonds, Walnuts

Technical Specifications

Feeding System

Vibration feeding with digging hopper

Service & Support

Support Coverage

- Free replacement parts for design defects during warranty
- Technical support provided
- User responsibility for human-factor damage

Warranty Period

1 Year

Maintenance Policy

Lifelong maintenance
