

# Automatic Open-Mouth Bagging Machine for Sugar

This automatic bagging machine is designed for packaging materials into open-mouth bags. It is suitable for woven bags with plastic coating and can complete material transmission, weighing, filling, packaging, bag flattening, sealing, sewing and conveying.

## ADDITIONAL IMAGES

## Overview

### LCS-MZDP Series Automatic Packing System

The LCS-MZDP Series is a fully automatic packing solution designed for open-mouth bags, ideal for high-volume operations. This system integrates material transmission, weighing, filling, packaging, bag flattening, sealing, and sewing into a single efficient line. It is particularly effective for handling coated poly woven bags, multi-layer kraft paper bags, and PE bags, making it a versatile choice for granular products like sugar and salt.

## Technical Specifications

### Packing Capacity

**600 bags/hour**  
Minimum

**1200 bags/hour**  
Maximum

<b>Model</b>	MZDP-2
<b>Weighing Range</b>	10kg, 20kg, 25kg, 50kg
<b>Precision</b>	+0.2% F.S.
<b>Power Supply</b>	220V/380V, 50HZ, 1P/3P (Customized)

## Compatibility & Applications

### Compatible Bag Materials

Coated Poly Woven • Multi-layer Kraft Paper • PE Bag

### Suitable For

- Sugar
- Granular Sugar
- White Sugar
- Sugar Powder
- Salt

## System Components

### Included Equipment

- Automatic Weighing Packaging Machine
- Automatic Packaging Machine
- Mesh-belt Conveyor
- Bag Feeding Machine
- Reversing Bag Flattener
- Control System
