

# Automatic Pallet Stretch Film Wrapping Machine

This automatic pallet stretch wrapping machine is designed for efficient and secure film wrapping of pallets. It features adjustable wrapping parameters and a rotating platform for uniform wrapping.

## ADDITIONAL IMAGES

## Overview

### High-Efficiency Pallet Wrapping

This automatic pallet stretch wrapping machine is engineered to optimize end-of-line packaging processes, specifically for food packaging and industrial logistics. It features advanced tension control technology to minimize material waste while ensuring maximum load stability during transport. Designed with a robust 'U' model chassis and intelligent sensor systems, it provides reliable, consistent performance for heavy-duty palletized goods.

## Technical Specifications

### Turntable Diameter

- 1500mm
- 1800mm

### Max Wrapping Height

- 2100mm
- 2400mm

### Model Number

JT-2000

### Max Wrapping Weight

2000 kg

### Max Wrapping Area

1300 x 1300mm

## Performance Metrics

### Pre-stretch Tension Range

**250 %**

Max Tension

### Turntable Speed

15 RPM

## Key Features

### Design Highlights

- 12-roller support system for smooth operation
- Belt-driven carriage (noise reduction)
- Integrative 'U' model chassis
- Rear-access maintenance hatch
- Aero-socket electrical connections

### Operational Features

Automatic Film Break, Soft Start/Stop, Photocell Height Detection, Turntable Orientation, Self-Protection Switch
