

Automatic Pallet Wrapping Machine with PLC Control

This automatic pallet wrapping machine is designed for efficient and secure wrapping of palletized goods. Equipped with a control panel, the machine allows adjustment of wrapping parameters including speed and tension.

Overview

Efficient Pallet Wrapping Solution

This automatic pallet wrapping machine is designed for efficient and secure wrapping of palletized goods in industrial environments. Featuring a rotating platform and a vertically moving film carriage, it ensures complete coverage and load stability for various pallet sizes. The integrated PLC control panel allows operators to precisely adjust wrapping parameters such as speed, tension, and cycle counts to streamline packaging and reduce material waste.

Key Features

Control System	PLC Control
Certifications	CE

Operational Parameters

Adjustable Wrapping Parameters

- Wrapping Speed
- Film Tension
- Number of Wraps

Design Features

- Rotating platform
- Vertical film carriage movement
- Robust industrial construction

Service & Support

After-Sale Service	Included
Warranty	Guarantee included
