

Automatic Paper Bag Making Machine

This high-speed machine automatically produces paper bags in various sizes. It is suitable for manufacturing paper bags for food packaging, retail, and industrial applications.

Overview

High-Speed Automatic Paper Bag Production

This high-speed automatic paper bag making machine is engineered for the efficient production of diverse paper bag sizes, catering to food packaging, retail, and industrial needs. It features advanced control systems alongside precision cutting and folding mechanisms to ensure consistent quality. Designed for continuous operation, the machine offers a robust construction that minimizes maintenance requirements while maximizing output.

Technical Specifications

Automation Features

- Automated feeding system
- Automated collection process
- Precision cutting mechanism
- Advanced folding system

Model Identifier

JCO 850

Suitable Applications

Food Packaging, Retail, Industrial

Operational Performance

Performance Highlights

1 Continuous
Operational Status

Maintenance Requirement

Low Maintenance
