Overview

High-Efficiency Die Cutting Solution

This automatic die cutting machine is engineered for high-speed, precise processing of paper packaging materials including cups, plates, and boxes. It features advanced roll feeding, automatic tension control, and a servo-driven system to ensure consistent, high-quality output with minimal waste. Designed for mass production environments, the unit integrates PLC controls and conveyor systems for efficient, automated workflow.

Capabilities & Applications

Supported Applications

Paper Cups, Paper Plates, Paper Boxes, Square Boxes, Creasing, Die Cutting, Embossing

Technical Features

Key Features

- Roll feeding system
- Automatic tension control
- High-speed rotary die cutting
- PLC automated operation
- Servo-driven positioning
- Conveyor belt for finished product collection
- Safety guards and emergency stop buttons

Logistics & Terms

Payment Terms

100% T/T • 30% Deposit • 70% Before Shipment • L/C at Sight

Delivery Lead Time

30 days

Warranty Period

1 Year

Service & Support

On-Site Support

Technician support is available for installation and operator training upon request. The buyer is responsible for daily allowance, travel tickets, accommodation, and food expenses for the technician.

Installation & Training

Yes
