

Automatic Paper Cup Forming Machine

This automatic paper cup forming machine is designed for high-volume production of disposable paper cups. It features automatic paper feeding, sealing, bottom punching, heating, knurling, and cup collection.

Overview

High-Efficiency Paper Cup Production

This automatic paper cup forming machine is engineered for high-volume production of disposable cups suitable for both hot and cold beverages. The system integrates advanced automation, including paper feeding, sealing, bottom punching, heating, and knurling, ensuring a streamlined manufacturing process. With a centralized control panel, operators can easily adjust production parameters and monitor real-time performance to maintain consistent quality.

Technical Specifications

Production Features

- Automatic paper feeding
- Precision sealing
- Bottom punching
- Integrated heating system
- Knurling
- Automated cup collection

Model Identifier	JBZ-A12
Applications	Hot Beverages, Cold Beverages, Disposable Cups

Control & Monitoring

Control Interface	Yes
