

Automatic Paper Cup Forming Machine

This high-speed machine automatically forms paper cups with precision. It integrates paper feeding, sealing, bottom punching, heating, knurling, and discharging for efficient production.

Overview

High-Efficiency Cup Production

This high-speed automatic paper cup forming machine is engineered for efficient and precise production, streamlining the manufacturing process. It integrates multiple critical functions including automatic paper feeding, sealing, bottom punching, heating, knurling, and cup discharging into a single robust unit. Designed for reliability and high output, this machine features a user-friendly control panel that allows for easy operation and adjustment, making it an ideal choice for professional paper cup manufacturing.

Key Features

Integrated Functions

- Automatic paper feeding
- Sealing
- Bottom punching
- Heating
- Knurling
- Cup discharging

Performance

Operational Status

High-Speed • Automated • Stable Performance

Model Identifier

JBZ-W130
