Product Overview

High-Efficiency Box Forming

This fully automatic erecting carton box forming machine is engineered for the high-speed production of various food packaging solutions. It is designed to reliably manufacture hamburger boxes, square boxes, lunch boxes, and french fry containers. With its robust construction and precision engineering, it ensures consistent output quality while maintaining low noise levels during operation.

Technical Configuration

Basic Configuration

- Electrical cabinet
- Hot melt or water-based glue applicator
- Discharge device
- Feeding device
- Forming device
- Servo control device
- Forming mould

Compatible Products

Hamburger Box, Square Box, Lunch Box, French Fry Box
