

# Automatic Paper Roll Punching Machine

This fully automatic die-cutting machine is designed for efficient and precise punching of paper rolls. It is equipped with a safety enclosure and a waste collection system, ensuring consistent quality and minimal material waste.

## ADDITIONAL IMAGES

## Overview

### High-Efficiency Automatic Die Cutting

This automatic paper roll punching machine is engineered for high-volume industrial processing, offering precise die-cutting capabilities for roll paper. Designed for consistent quality and minimal material waste, it features a robust construction suitable for demanding production environments. With its automated feeding and punching mechanisms, it streamlines the manufacturing process for paper-based products.

## Performance Metrics

### Production Capacity

**200 times/min**  
Max Die Cutting Speed

**35 m/min**  
Min Paper Feed Speed

## Technical Specifications

### Paper Compatibility

- 125-350g/m2 roll paper
- Width range: 360-850mm
- Roll diameter: <1.5m

### Power Requirements

**4 kw**  
Main Power

**8.5 kw**  
Total Power

Compressed Air

0.2mm/min, 0.5MPa

## Physical Dimensions

### Machine Dimensions

Component	Dimensions (L x W x H)
Main Machine	2900 x 1400 x 1700 mm
Electrical Box	700 x 700 x 1350 mm

Machine Weight	3 T
Roller Surface Length	950 mm

## Compliance

Certifications	CE
