

# Automatic PE Film Cuff Packing Machine

This automatic cuff packing machine is designed for PE film packaging. The system integrates models ZT-11045M and ZT-11060 to automate the cuffing and packing process.

## Machine Overview

### Professional Automated Packaging Solution

The automatic PE film cuff packing machine integrates advanced feeding, wrapping, sealing, and contraction processes into a streamlined workflow. Designed for versatility, this system handles single objects or paper carriers with ease, ensuring a strong and uniform seal. Equipped with a programmable PLC controller, it offers precise speed regulation and reliable operation for industrial production lines.

## Technical Specifications

Control System	Mitsubishi PLC Programmable Controller
Sealing Design	Integrated three-piece sealing knife for machine, electricity, and gas synchronization
Transmission Control	Frequency converter speed control

## Operational Features

### Performance Highlights

- Strong, crack-resistant sealing line
- Non-stick feed belt design
- Even hot air distribution in furnace chamber
- Production line integration ready

Packaging Workflow	Automatic Feeding, Film Wrapping, Sealing, Contraction, Cooling
