Overview

Professional Automatic Butter Production

This versatile production line is designed for the high-efficiency manufacturing of peanut butter, sesame tahini, and cacao butter. Featuring a fully enclosed production process, it ensures high reliability and zero pollution, meeting strict export standards for food quality. The system is highly automated and cost-effective, offering a complete solution from raw material roasting to final product degassing and cooling.

Key Features

Automation Level

High Automation • Full Enclosed Production • Continuous Processing

Construction Material

Stainless Steel

Compliance

Export Standard, No Pollution, Food Grade

Processing Components

The integrated production line features high-grade stainless steel construction for hygienic processing.

System Components

- Peanut Roaster
- Dry Peeling Machine
- Automatic Feeding Machine
- Grinding Machine
- Vacuum Degassing Machine
- Cooling Machine
- Stirring Tank
- Buffer Tank

Applications

Supported Applications

Peanut Butter, Sesame Tahini, Cacao Butter, Sunflower Seed Butter, Pecan Butter, Cashew Nut Butter

Technical Capabilities

Processing Stages

- Roasting
- Cooling
- Peeling
- Multi-stage Grinding
- Mixing
- Degassing
- Filling
- Capping

Customization

Yes

After-Sales & Warranty

Machine Guarantee

1 Year

Warranty

Service & Support

- Lifelong maintenance support
- Free replacement parts for design defects
- Technical support for user-related issues
