

Automatic PET Bottle Blow Molding Machine, 5L Max

This fully automatic blow molding machine is designed for producing PET bottles up to 5 liters. Its high-speed, energy-efficient design incorporates advanced control systems for precise temperature regulation and consistent bottle quality.

Overview

High-Efficiency PET Production

This fully automatic blow molding machine is engineered for the high-volume production of PET bottles, accommodating sizes up to 5 liters. It features an advanced control system that ensures precise temperature regulation, resulting in consistent bottle quality across every cycle. Built for durability and reliability, this machine is an ideal solution for manufacturing water bottles, beverage containers, and various other PET packaging applications.

Technical Specifications

Maximum Bottle Capacity	5 L
Operation Mode	Fully Automatic
Suitable Applications	Water Bottles, Beverage Containers, PET Packaging

Key Features

Performance Highlights

5 L

Max Capacity

Design Advantages

- High-speed production capability
- Energy-efficient design
- Advanced temperature regulation
- Robust construction for long-term reliability
- Minimal maintenance requirements
