

Automatic PET Bottle Blow Molding Machine Up to 2L

This fully automatic blow molding machine is designed for producing PET bottles. It can produce bottles up to 2 liters in volume and is suitable for beverage, food, and cosmetic packaging applications.

Overview

High-Efficiency PET Blow Molding

The CSD-AB4-2L is a fully automatic blow molding machine engineered for high-speed production of PET bottles up to 2 liters. It integrates a high-speed preform loading system with precise temperature control to ensure consistent output quality across beverage, food, and cosmetic packaging applications. Designed for reliability and ease of use, this machine features energy-efficient heating and robust construction to support long-term, stable performance.

Target Applications

Beverage Packaging, Food Packaging, Cosmetic Packaging

Key Features

System Capabilities

- High-speed preform loading system
- Precise temperature control
- Energy-efficient heating technology
- User-friendly interface
- Robust construction for long-term reliability
