

Automatic PET Bottle Blowing Machine

This fully automatic PET bottle blowing machine is designed for high-speed production. It features a modular design and advanced servo control for precise and efficient operation, ensuring consistent bottle quality.

Overview

High-Efficiency PET Bottle Production

This fully automatic PET bottle blowing machine is engineered for high-speed, consistent production of high-quality bottles. Featuring a modular design for streamlined maintenance and advanced servo control technology, it ensures precise operation across diverse bottle sizes and shapes. It is an ideal solution for beverage, food, and pharmaceutical manufacturing lines requiring reliable and automated performance.

Key Features

Automation Systems

- Automatic preform loading
- Automated heating system
- Automated blowing process
- Automatic ejection system

Control Technology

Servo Control, Modular Design, User-Friendly Interface

Applications

Suitable Industries

Beverage • Food • Pharmaceutical
